OPTICAL COMFORT

Multicell fixtures have become the go-to for most general lighting applications. The optical comfort of LAMDA through the perfect combination of lens and bezel will silence glare points. LAMDA offers a balance of powerful lighting with a visually comfortable space.

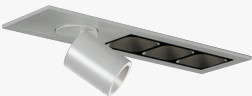

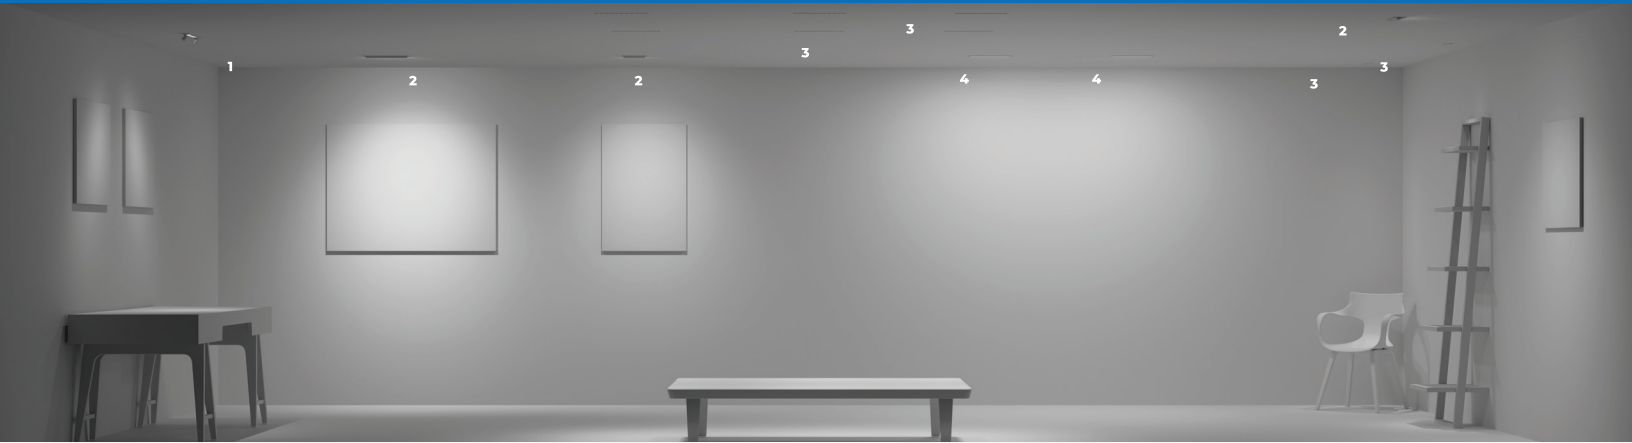

COMPLETE CONTROL

LAMDA has several dimming and control options. It's compatible with all 0-10v systems for universal voltage, 120-277V, and Triac / ELV. LAMDA also works with most wireless Bluetooth® technologies, PoE (Power over Ethernet), and our DX Driver Panel.

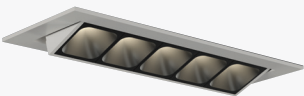

APPLICATIONS

LAMDA is a complete system that allows for an end-to-end multicell design.

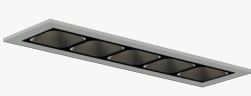

- DFX - fixed units give generous, even distributions with excellent cutoff.
- DWx – superior wall wash performance.
- DAX – adjustable gives options regardless of placement, with a 20° tilt.
- DFSx – fixed with retractable, adjustable spots for additional versatility.
